WHAT IS ORBASOFT® UTILITIES™?

The publisher of Orbasoft® Utilities™, Orbasoft ApS is a privately held company registered in Denmark (company registration number: DK 31871301). Founded in 2008, Orbasoft develops computer maintenance and optimization software for Microsoft® Windows®. Orbasoft ApS is a software development company powered by a dedicated and passionate team of highly-skilled IT-professionals.

About Orbasoft® Utilities™

Orbasoft® Utilities™ is a 3-in-1 scanner and system optimization software. It protects you against viruses and spyware. It cleans unused files, thereby freeing space and allowing your computer to run faster. The built-in History Cleaner removes internet surfing traces protecting your privacy. Orbasoft® Utilities™ is designed for Microsoft® Windows® 7, Vista™ and XP™.

The scanning technology of Orbasoft® Utilities™ relies on the close collaboration between Orbasoft ApS and FRISK Software International. Established in 1993, FRISK Software is a leading company in antivirus research and the producer of F-Prot Antivirus software. Orbasoft® Utilities™ includes the best scan technologies of both companies. Read more about our technology partnership with FRISK Software here: www.f-prot.com/partners/oem/current_oem_partners

Mission and vision

Our mission and vision is to keep computers clean, and to protect Microsoft® Windows® users against all forms of privacy and security risks.

ORBASOFT® UTILITIES™ FEATURES

Active Protection

Active Protection is the premium software feature that will perform its automatic functions to kill spywares to keep your system safe.

Graphical User Interface (GUI) of Orbasoft® Utilities™

The Graphical User Interface (GUI) of Orbasoft® Utilities™ is designed keeping in mind the global customers needs. It is designed in a simple and comprehensible manner so that our users find it easy to use.

Orbasoft® Utilities™ - compatibility

Orbasoft® Utilities™ is compatible with *Windows 7, Vista* and the *XP versions of Microsoft Windows*. It is not compatible with *Windows 98* and earlier versions.

Orbasoft® Utilities™ automatically download definition updates

With the automatic update option enabled, Orbasoft® Utilities™ automatically updates itself.

Log Scan Summary

Log scan summary creates a Scan report which is a detailed description of the scan conducted by Orbasoft® Utilities™. It will identify which threats have been detected and removed/healed.

Registry Cleaner

Defunct registry keys can be removed using Orbasoft® Utilities™ Registry Cleaner to enhance the computer's performance by purging it from corrupted registry keys which often belong to malicious threats.

System Restore Point before repairing

Set a Windows system restore point before repairing the problems identified. This will make it easier for you to revert back to the old settings of the system. This option will make it easier for you to identify which programs should be removed or healed.

Scheduled Scanner

Set scheduled scans and set a time and scan type so that Orbasoft® Utilities™ helps you to use your time efficiently.

What is the purpose of Registry Backup and Restore Options?

This will allow you to make full registry backups whenever you wish to preserve a working copy of your windows registry. The backup can be restored whenever required.

ORBASOFT[®] UTILITIES[™] SYSTEM REQUIREMENTS

Processor: Pentium III 600MHz or faster

RAM: Operating system + 100 MB

Hard Disk: 50 MB free space recommended

Operating Systems: Windows XP, Vista, 7

INSTALLING ORBASOFT[®] UTILITIES[™]

For questions related to downloads and purchase of Orbasoft[®] Utilities[™] please visit

www.orbasoft.com/support

If you are installing Orbasoft[®] Utilities[™] on Windows 2000 or XP, make sure you are logged in as administrator or you have the administrative rights.

Initiating Installation Process

After downloading the set up of Orbasoft[®] Utilities[™] from the web site you can start the installation process easily. All you have to do is to open the set up file and follow a simple process which will result in the installation of the latest version of Orbasoft[®] Utilities[™] on your computer.

Turn off any other antivirus/antispyware before installation

To make sure there are no errors in the installation process it is recommended you turn off other antivirus or anti spyware software installed on your computer. This will help to decrease the chance of installation of corrupted files.

Begin Installation Screen

Soon after starting the installation process a welcome screen will appear which will ask you to read the License Agreement. Read the Agreement and then accept it to continue the process.

Successful Installation

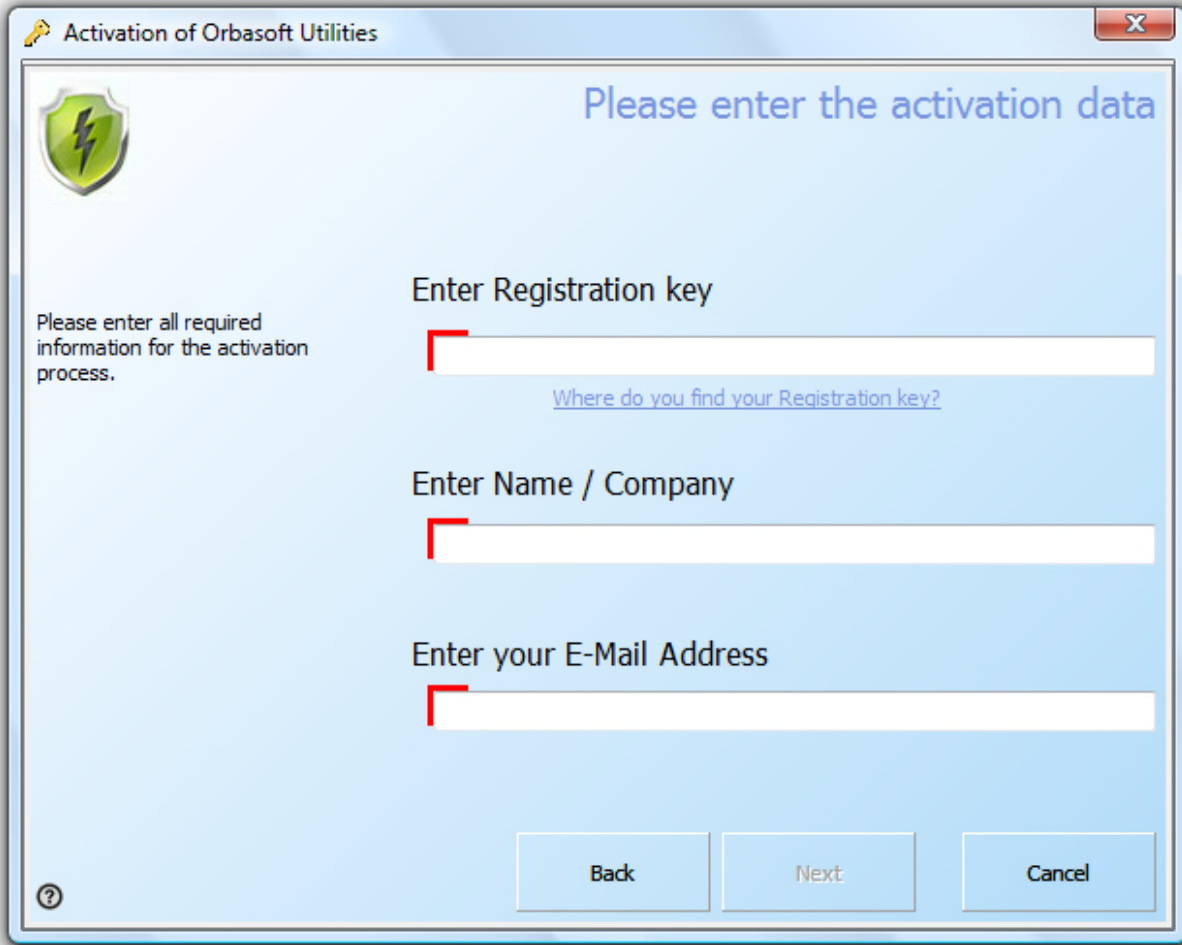

Soon after a successful installation you will receive a confirmation message. Orbasoft[®] Utilities[™] will update itself after installation. Make sure it is updated with the most recent definitions before conducting a scan.

REGISTERING ORBASOFT[®] UTILITIES[™]

You have to register your copy of Orbasoft[®] Utilities[™] to get all premium features which are not available to the free trial version users. A notification will appear automatically, which will ask you to enter the registration key. The registration key is sent via email to all registered users at the time of purchase. You can purchase the registration key here: www.orbasoft.com/order. You may also register it manually from the main screen of the software under the link "Registered To". The following registration box will appear:

You then press on the "Next" button, and the following screen will appear:

Activation of Orbasoft Utilities

Please enter the activation data

Please enter all required information for the activation process.

Enter Registration key

[Where do you find your Registration key?](#)

Enter Name / Company

Enter your E-Mail Address

Back Next Cancel

After purchasing your license at www.orbasoft.com/order you will receive an email with your registration key. Please enter this registration key in the “Enter Registration key” field, and then click the “Next” button.

SCANNING

To conduct a scan, Orbasoft[®] Utilities[™] gives you three options: *Quick Scan*, *Deep Scan* and *Custom Scan*.

Quick Scan

The Quick scan option will check the most common areas in your PC for problems, infections and registry errors. These include Running Programs, Loaded Modules, Startup locations, Cookies, Various Registry Infections and corruptions. Quick Scan removes most of the infections, however, it is recommended to run Deep Scan at least once per week. Quick scan completes in less than 30 minutes.

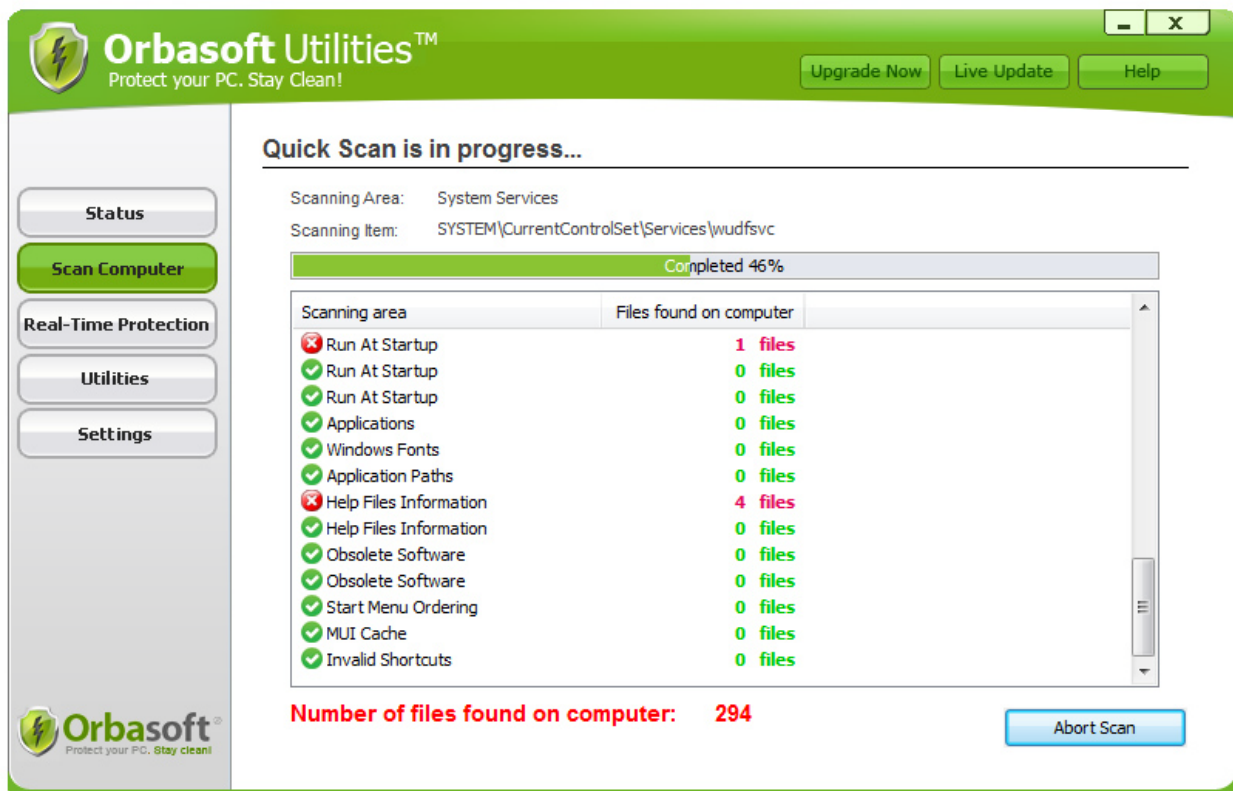

Deep Scan

The Deep scan option will check the whole PC for all types of threats and infections providing maximum security. It will detect and remove a number of problems/corruptions from all running processes/loaded modules, all system hard drives and all registry locations.

Custom Scan

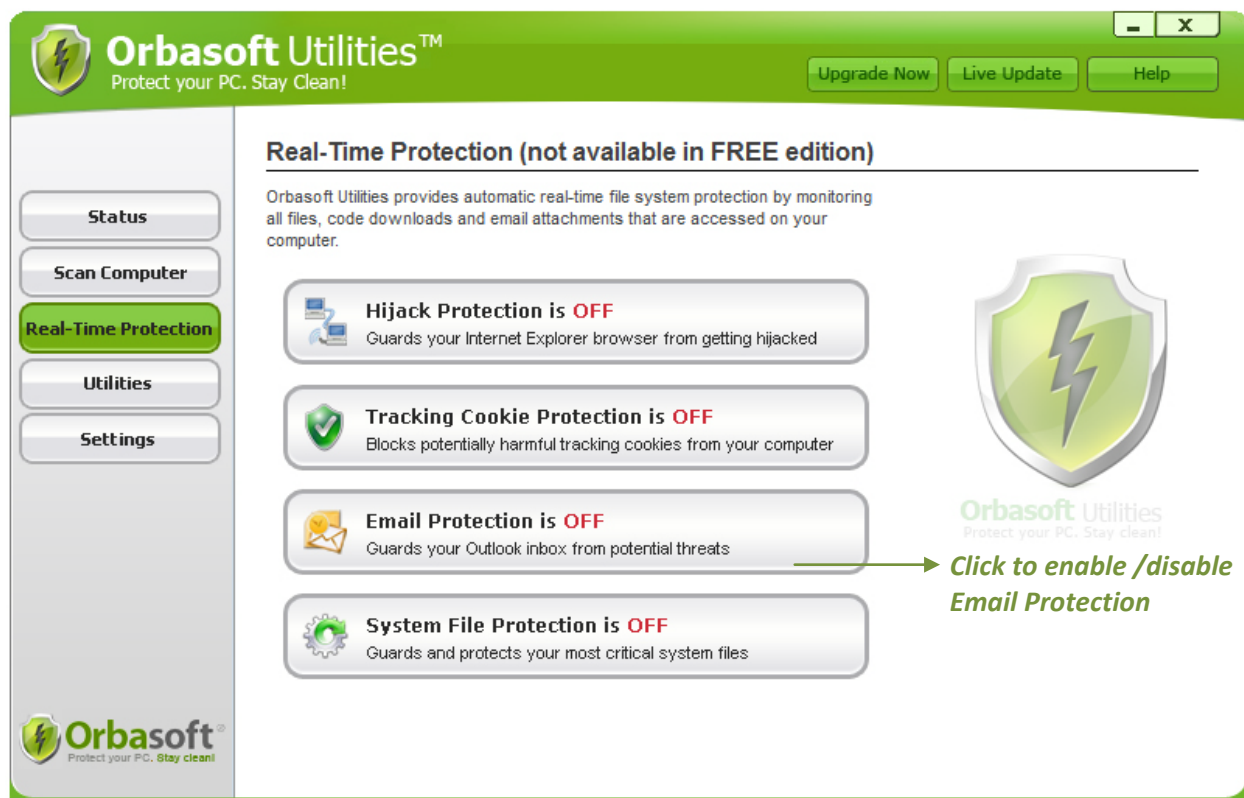

Custom scan will let you check the selected areas of your computer. This setting is recommended for more advanced users. You can add paths of the folders and/or drives. You can also select which problems the custom scan should scan for. There are given options of *Spywares*, *Corrupt Registries*, *Tracking Cookies* and *Invalid Shortcuts*. The screen shot of the custom scan option is given below.

Real-Time Protection

The Real-Time Protection option acts as a watchdog for your computer. You can customize the sub-features using the Real-Time Protection option. Various warning alerts would appear if, and only if, there is some intrusion from a malicious program on your computer.

While receiving the alerts you may allow or disallow the programs depending on their nature. The Real-Time Protection option contains components like *Hijack Protection*, *Tracking Cookie Protection*, *Email Protection* and *System File Protection*. You can enable or disable all protections in the same manner as displayed below. Real-Time Protection is not available in the free edition.

UTILITIES

The utility option of Orbasoft[®] Utilities™ is a managerial tool that will allow you to manage certain computer programs as per your ease.

Startup Programs

These are the programs that start while your Windows starts. You can simply uncheck the start up programs mentioned in the list as shown below to stop from starting with the Windows start up.

Browser Help Objects (BHO)

Browser Help Objects are add-ons and tool bars that start every time your browser starts. You can view details about these items by using the BHO feature of Orbasoft[®] Utilities™. BHO will tell you the detailed information of the add-ons and toolbars and the companies to which they belong. You may also remove these components if you wish to do so. You can simply check or uncheck the items on the BHO list as it is suitable for your personal web browsing.

Add/Remove Programs

Add/Remove programs are items which are present at the Add/Remove section of the control panel. By using the Add/Remove option of Orbasoft[®] Utilities™ you can more easily remove programs from your computer. You can simply remove an item from the list by double clicking on it.

Registry Backup/Restore

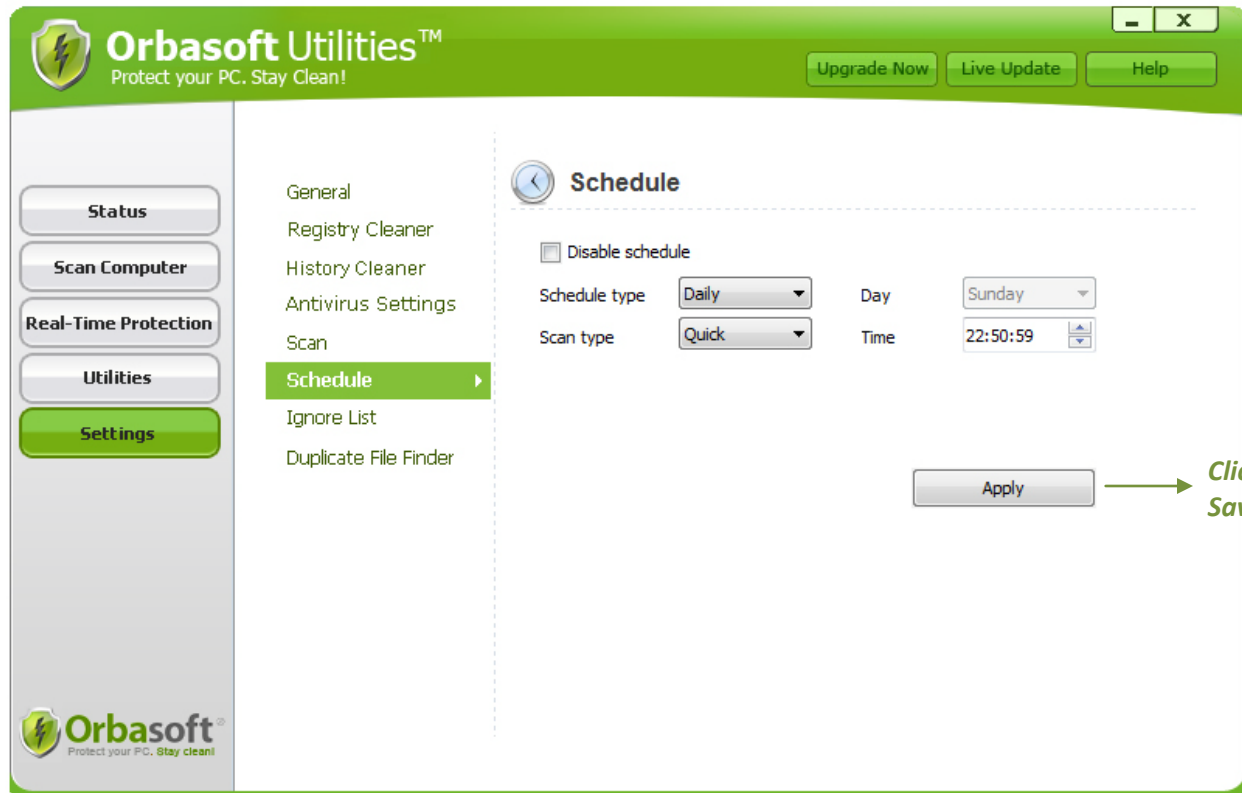

This will allow you to make full registry backups whenever you wish to preserve a working copy of your Windows registry. The backup can be restored anytime when required. You can set the registry backup and restore paths by clicking on the Browse button.

SETTINGS

The Settings option of Orbasoft[®] Utilities™ will help you to manage all your software functions. There are four settings options: *General*, *Scan*, *Schedule* and *Ignore List*.

General Settings

Use General Settings to prioritize options like: starting Orbasoft[®] Utilities™ on start up and automatically check for updates of the software. Also check Show pop up alerts if you wish to receive warning alerts followed by using the “allow/disallow” function for different programs that may be of suspicious nature.

Scan Settings

The Log scan result summary option will create a detailed scan report and save it for references. The Set Restore Point before repair option will allow you to create a back up of the previous computer settings. Check Add scan option to Explorer context menu to enable a scan of individual items through right clicking the scan option. Check the Automatically move unchecked items during repair to ignore list option to move the un-scanned items that may be corrupted registries, tracking cookies etc to the ignore list.

Schedule Settings

You may enable or disable scheduled scans. By enabling the scheduled scans option you can set Orbasoft[®] Utilities[™] to conduct daily/weekly and quick/deep scans on a particular day and a particular time. This setting allows you to save time.

Ignore List

Ignore List contains detected items, which can be potential problems. You can simply remove the items from the ignore list by clicking the remove button.

UNINSTALLING ORBASOFT[®] UTILITIES[™]

You can use one of the methods below to uninstall Orbasoft[®] Utilities[™].

Uninstaller

Go to the Orbasoft[®] Utilities[™] option in your Start menu.

Run *Uninstall Orbasoft[®] Utilities[™]*.

Verify uninstalling by selecting Yes.

When the program exits, Orbasoft[®] Utilities[™] has been successfully uninstalled.

Control Panel

Go to *Control Panel > Run Add/Remove Programs > Select Orbasoft[®] Utilities[™]* and click on *Change/Remove* button to uninstall.
